Sun 9:00-4:00

6 CEs

TOUCH TO INFORM Seminars familiarize Licensed Massage Therapists, Health Care Professionals, educators and other participants with applicable concepts for sensory learning from *The Feldenkrais Method*® to enhance outcomes.

The Walking Engine

Discover your **DIAGONALS**:

Free your **NECK & SHOULDERS**, find **DIAGONALS** in your torso, and refine the actions in your **FEET**.

Your torso, the area between the arms and legs, is your **'ENGINE' FOR WALKING**. The large muscles that surround the torso should optimize one's posture, coordination and balance. If the autonomic nervous system senses the slightest bit of falling, these muscles tighten and stop moving.

FEET support both stability and mobility in Posture and action. Optimize mobility and you find stability!

Discover better balance, coordination and rhythm, and discover new patterns for standing and moving with more lightness and comfort in your **WALK**.

Using **"TOUCH TO INFORM"** can **lower** hyper-tonicity while engaging your client. *The Feldenkrais Method*® for neuro-learning facilitates the ability to recognize habitual patterns of action, allows time to quiet those actions and, through inquiry, aids in the discovery of alternative movement patterns that support more ease and efficiency, in movement and thought.

January 31 - February 2, 2020

District Dance Academy
14100 US -19 Suite 138
St Petersburg, FL
